ANNEX I – Instructions to Offerors

These instructions contain general guidelines and instructions on the preparation, clarification, and submission of Proposals.

A. INTRODUCTION

1. General

The purpose of this Request for Proposal (RFP) is to invite Sealed Proposals for professional services to be provided to the United Nations Educational, Scientific and Cultural Organization - UNESCO.

2. Eligible bidders

Bidders should not be associated, or have been associated in the past, directly or indirectly, with a firm or any of its affiliates which have been engaged by UNESCO to provide consulting services for the preparation of the Terms of Reference, and other documents to be used for the procurement of services to be purchased under this Request for Proposal.

This bid is open to all national and international suppliers who are legally constituted, can provide the requested services.

Bidders are ineligible if at the time of submission of the offer:

- (a) The bidder is on the exclusion list published on the global portal for suppliers of the United Nations Organization, (<http://www.ungm.org>) due to fraudulent activities.
- (b) The name of the bidder appears on the Consolidated United Nations Security Council Sanctions List which includes all individuals and entities subject to sanctions measures imposed by the Security Council.
- (c) The bidder is excluded by the World Bank Group.

3. Fraud and corruption

UNESCO requires that bidders, contractors and their subcontractors adhere to the highest standard of moral and ethical conduct during the procurement and execution of UNESCO contracts and do not engage in corrupt, fraudulent, collusive, coercive or obstructive practices.

For the purpose of this provision such practices are collectively referred to as “fraud and corruption”:

- “Corrupt practice” is the offering, giving, receiving or soliciting, directly or indirectly, an undue advantage, in order that the person receiving the advantage, or a third person, act or refrain from acting in the exercise of their official duties, or abuse their real or supposed influence;
- “Fraudulent practice” is a knowing misrepresentation of the truth or concealment of a material fact aiming at misleading another party in view of obtaining a financial or other benefit or avoiding an obligation, or in view of having another party act to their detriment ;
- “Collusive practice” means an arrangement between two or more parties designed to achieve an improper purpose, including influencing improperly the actions of another party ;
- “Coercive practice” means impairing or harming, or threatening to impair or harm, directly or indirectly, any party or the property of the party to influence improperly the actions of a party.
- “Obstructive practice” means acts intended to materially impede the exercise of UNESCO’s contractual rights of audit, investigation and access to information, including destruction, falsification, alteration or concealment of evidence material to a UNESCO investigation into allegations of fraud and corruption.

- “Unethical practice” means conduct or behaviour that is contrary to Staff or Supplier codes of conduct, such as those relating to conflict of interest, gifts, hospitality, postemployment provisions, abuse of authority and harassment.

UNESCO expects that all suppliers who wish to do business with UNESCO will embrace the [United Nations Supplier Code of Conduct](#)

UN Agencies have adopted a zero tolerance policy on gifts and therefore, it is of overriding importance that UNESCO staff should not be placed in a position where their actions may constitute or could be reasonably perceived as reflecting favourable treatment of an individual or entity by accepting offers of gifts, hospitality or other similar favours. Vendors are therefore requested not to send or offer gifts or hospitality to UNESCO personnel.

UNESCO will:

- Reject a proposal to award a contract if it determines that a vendor recommended for award has engaged in fraud and corruption in competing for the contract in question.
- Cancel or terminate a contract if it determines that a vendor has engaged in fraud and corruption in competing for or in executing a UNESCO contract.
- Declare a vendor ineligible, either indefinitely or for a stated period of time, to become a UN registered vendor if it at any time determines that the vendor has engaged in fraud and corruption in competing for or in executing a UNESCO contract.

Any concern or evidence that corruption or fraud may have occurred or is occurring related to a UNESCO contract shall be forwarded to the Office of Internal Oversight. Please refer to [how-to-report-fraud-corruption-or-abuse](#).

UNESCO will examine the Proposals to determine whether they are complete, whether any computational errors have been made, whether the documents have been properly signed, and whether the Proposals are generally in order.

Prior to the detailed evaluation, UNESCO will determine the substantial responsiveness of each Proposal to the Request for Proposals (RFP). For purposes of these Clauses, a substantially responsive Proposal is one, which conforms to all the terms and conditions of the RFP without material deviations. The determination of a Proposal's responsiveness is based on the contents of the Proposal itself without recourse to extrinsic evidence.

A Proposal determined as not substantially responsive will be rejected by UNESCO.

23. Evaluation and comparison of proposals

A two-stage procedure will be used in evaluating the proposals, with evaluation of the technical component being completed prior to any price component being opened and compared. The Price Component will be opened only for submissions that passed the minimum score of 70 % of the total points obtainable for the technical evaluation.

The technical proposal is evaluated on the basis of its responsiveness to the Terms of Reference (TOR).

OPTION 1 – LOWEST PRICE OF TECHNICALLY RESPONSIVE PROPOSALS

The price proposal of all offerors, who have attained minimum 70 % score in the technical evaluation, will be compared. **The contract will be awarded to the firm/institution offering the lowest price.**

Technical evaluation criteria:

Sample: Summary of Technical Proposal Evaluation Forms		Points Obtainable	Name of Firm / Institution		
			A	B	C
1.	Expertise of Firm / Institution submitting Proposal	300			
2.	Proposed Work Plan and Approach	500			
3.	Personnel	200			
	Total	1000			

Evaluation of the price proposals (of all Offerors who have attained minimum 70 % score in the technical evaluation) will be based on the weight scoring method as follows:

- Financial proposals are opened and list of prices is prepared, where the lowest price is ranked as the first one (receiving highest amount of points) and the most expensive as the last one (receiving the least amount of points).
- Lowest price is given maximum points (e.g. 300), for other prices the points are assigned based on the following formula: $[\text{Amount of points} = \frac{\text{lowest price}}{\text{other price}} * \text{total points obtainable for financial proposal}]$

An example:

- Offeror A – lowest price ranked as 1st in the amount of USD 10,000 = a
- Offeror B – second lowest price ranked as 2nd in the amount of USD 15,000 = b
Points assigned to A = 300 & Points assigned to B = 200 (following formula: $a/b * 300$ i.e. $10,000/15,000 * 300 = 200$ points)

Option 2: Combined Technical and Financial Evaluation Form

Sample: Summary of Financial Proposal Evaluation Forms		Points Obtainable	Name of Firm / Institution			
			A	B	C	D
	Sub-total Technical Proposal	700				
	Sub-total Financial Proposal	300				
	Total 1000					

F. AWARD OF CONTRACT

24. Award criteria, award of contract

UNESCO reserves the right to accept or reject any Proposal, and to annul the solicitation process and reject all Proposals at any time prior to award of contract, without thereby incurring any liability to the affected Offeror or any obligation to inform the affected Offeror or Offerors of the grounds for such action.

Prior to expiration of the period of proposal validity, UNESCO will award the contract to the qualified Offeror whose Proposal after being evaluated is considered to be the most responsive to the needs of the organisation and activity concerned.

25. Purchaser's right to vary requirements at time of award and to negotiate

UNESCO reserves the right at the time of award of contract to increase or decrease by up to 20% the quantity of services and goods specified in the RFP without any change in hourly/daily or any other rates or prices proposed by the Bidders or other terms and conditions.

ANNEX III – Terms of Reference (TOR)

Title: Spotlight Initiative – Development of a Harmonized Comprehensive Sexuality Education, Gender, HIV and Human Rights Curriculum Framework for Higher and Tertiary Institutions in Zimbabwe

1. Introduction:

UNESCO is seeking the services of an academic institution or experienced consultants affiliated to an academic institution to develop a Curriculum Framework on Comprehensive Sexuality Education, Gender, HIV and Human Rights for use in higher and tertiary education institutions in Zimbabwe.

This assignment derives from the high level advocacy meeting of October 2017 held at Montclair Hotel and attended by Vice-Chancellors, Deans of Students, student representatives, senior management of line ministries such as Higher and Tertiary Education, Science and Technology Development, Health and Child Care, the National AIDS Council and Development Partners. The meeting was held under the theme, *High Level Advocacy Meeting on Sexual and Reproductive Health, HIV and AIDS for Students in Universities*. Through a communique, the fifteen universities present committed to among other things: interrogate University Policies, Ordinances and funding mechanisms in support of the provision of Comprehensive Sexuality Education, Sexual and Reproductive Health services for students; align laws and policies with the Constitution of Zimbabwe and other progressive international protocols in order to create an enabling environment for students' positive SRHR and HIV outcomes; and strengthen the necessary capacities of Universities to deliver Comprehensive Sexuality Education that meets international standards.

2. Background and Justification:

Higher and Tertiary Education Institutions (HTEIs) in Zimbabwe are home to a large number of young adults at the peak of their sexual lives. They are vulnerable to sexual and reproductive health (SRH) related concerns and risks as they navigate new responsibilities, relationships, and experiences on their own and in unfamiliar settings. Negative SRH outcomes, such as unintended pregnancies and sexually transmitted infections (STIs), immediately affect students' well-being and can cause disruptions in educational attainment, career progression, and life goals, ultimately limiting the potential of this critical human capital to contribute towards personal, community and national development.

Yet, it is always assumed that because students have reached the tertiary level of education, they have received the education that equips them to avoid negative health outcomes. The reality for Zimbabwe is that too many young people are still growing into adolescence and adulthood without much knowledge about their reproductive health and sexuality and in a context of poor access to sexual and reproductive health services.

Students in undergraduate programs typically fall between the ages of 18 and 24. A 2018 situation analysis study commissioned by UNESCO in selected institutions in Zimbabwe and Tanzania showed that for many students, the age of sexual debut coincides with entry into college in a context of low condom use. Sixty-six percent (66%) of female students and forty-seven (47%) of male students had not used a condom the first time they had sex¹. Previous studies carried out on knowledge, attitudes and practices among youths with respect to HIV and other

STIs indicated that significant number of students had sexual experience and/or were sexually active, had multiple sexual partners, reported symptoms of STIs, and experienced unwanted pregnancy and abortion. The same study found gaps in students' knowledge on HIV and AIDS; only 63% of respondents in Zimbabwe correctly answered three questions regarding HIV. Particularly worrying was the 73% who correctly answered the question regarding the reduction of HIV risk through regular use of a condom. Condom use is very low particularly among female students. This may be because of low risk perception, but also because of prevailing norms and attitudes which stigmatize young women who ask their partners to use condoms. Young women's rights to a safe learning environment, free from sexual and other kinds of violence, and to comprehensive SRH information and services, is currently limited in HTEIs².

Zimbabwe's tertiary enrolment rate has continued to increase despite deteriorating public investment in education, underscoring the strong demand for tertiary education among Zimbabwean households. According to the Education Report (2017), there were 144,442 students in higher and tertiary education institutions in Zimbabwe, covering universities, teachers' colleges and polytechnics³. Of these students, 48% were males and 52% females. Higher and Tertiary Education Institutions (HTEIs)⁴ in Zimbabwe are yet to become a target of well-structured comprehensive sexuality education programs and of wide-ranging sexual and reproductive health services for students. Very often, higher and tertiary education institutions are typically viewed as resources for generating research findings, and less often as potential sites for actual interventions⁵. Yet, HTEIs campuses provide expansive, eager-to-learn populations of young people, with growing and largely unmet sexual and reproductive health needs. A focus on addressing issues that affect human capital development at tertiary level is important if Zimbabwe is to enjoy the benefits of the projected demographic dividend.

Life skills-based health education, especially Comprehensive Sexuality Education has been implemented unevenly within higher and tertiary education institutions across the country with no real coordination or monitoring of implementation. There is an ongoing debate about the best way to integrate sexuality education i.e. mainstreaming throughout the curriculum, or with devoted courses. Where HIV and sexuality education courses have been implemented they are often under-resourced and rely on outdated teaching methods which do not appeal to young people.

As such, this assignment aims to develop a unified curriculum framework that will be used and adapted by all higher and tertiary institutions in the delivery of Comprehensive Sexuality Education. In addition to knowledge, skills building and promoting positive values, the focus is also to ensure that students have access to youth friendly and responsive sexual and reproductive health services and commodities while on campus. The different life skills curricula currently being implemented by higher and tertiary education institutions have largely remained HIV and AIDS focused to the exclusion of broader sexuality issues affecting students. The curricula seem to be having a positive effect on students' knowledge and awareness of HIV and AIDS, but they do not adequately meet the broader goal of promoting healthy behaviour and positive attitudes. The existing curricula emphasizes information about HIV and AIDS and not the advancement of life skills that would allow students to develop 'healthy lifestyles'.
