Identifying Indicators in Information Literacy Competency - Differentiating Between Objective and Subjective Data

Presenter: Szarina Abdullah, PhD

Professor, Faculty of Information Management, Universiti Teknologi MARA, Selangor, Malaysia
Principal Consultant, Wisdom Synergy Enterprise, Selangor, Malaysia

Email: szarina@wisdomsynergy.com or mahavera47@gmail.com

Mobile: +019-3572209
1. explains the concept of ‘competency’ in Information Literacy and the methodologies for measuring information literacy competency.

2. focuses on using evidence-based data as indicators for information literacy.

3. Evidence-based or objective data are contrasted with self-assessment and perception-based or subjective data.
3. COMPETENCY: Definitions

1. The generic knowledge, skills, or attitude of a person, related to effective behavior as demonstrated through performance.

2. A behavior, or set of behaviors that describe excellent performance in a particular work context.

3. One’s faculty of doing things appropriately, based on one’s abilities. ABILITY – inherent resources, intellectual & physical in humans which may be actualised in everyday practices.
Evidence-based Evaluation

Good decision-making needs reliable data.

Competent managers use factual data in decision-making to avoid biases / unfairness and to maintain integrity.
<table>
<thead>
<tr>
<th>Observation</th>
<th>Participants Unaware / Unaffected</th>
</tr>
</thead>
<tbody>
<tr>
<td>Observe how children play in a small group.</td>
<td></td>
</tr>
<tr>
<td>Observe how the dept. head conducts meetings.</td>
<td></td>
</tr>
<tr>
<td>Observe how students search for information.</td>
<td></td>
</tr>
</tbody>
</table>

**Data Tracking**

Info. system used to track activities & behaviors

**Principle:** *Action cannot lie*. Words can lie.

Collect data from observable behavior / actual incidents / recorded evidences = objective, factual data
Perception vs. Fact

Are female students more hardworking than male students?

What are the empirical data?
Collect facts from BEHAVIOR and ACTION

- What time did the students get up in the morning?
- What did they do the first thing after they get up?
- What did they have for breakfast? How long did they eat BF?
- What time did they start working? What time did they break for tea?
- What time did they pack up to go home? Go somewhere else?
The relationship between database usage by students and their academic achievement: a study at the National University of Malaysia

204 graduates from Faculty of Science, NUM, July 1999

Use of Databases

- BA: $C = 74\% ; \ M = 26\%$
- FSTA: $C = 75\% ; \ M = 25\%$
- DAO: $C = 100\% ; \ M = (NIL)$
- Thesis: $C = 62\% ; \ M = 38\%$
- SCI: $C = 77\% ; \ M = 26\%$
- LAIL: $C = 74\% ; \ M = 26\%$

Total Database Use

- $C = 72\% ; \ M = 28\%$

Length of Usage

- First and Second class students: May - October
- Third class students: May - July
Turn Perceptive Survey into Evidence-based

• The library has adequate collection.

  - strongly agree  - agree  - neutral  - disagree  - strongly disagree

• The library has up-to-date collection.

  - strongly agree  - agree  - neutral  - disagree  - strongly disagree

What instruments should be used to replace perception with evidence-based data?
Adequate collection: Evidences
1
2
3

Up-to-date collection: Evidences
1
2
3
PERCEPTION-BASED vs. EVIDENCE

1. My ability to search electronic databases is:
   - advanced
   - moderate
   - beginner

1. If I want specific items on “Bird Flu” I will use:
   - Search term, “Bird” and “Flu”
   - Search term, “Bird” or “Flu”
   - “Bird” not “Flu”
IL skills applicable to all human development (UNESCO 2008)

a. Recognise information needs

b. Locate and evaluate the quality of information

c. Store and Retrieve information

d. Make effective and ethical use of information, and

e. Apply information to create and communicate knowledge.

(ALA 2004)

1. recognize when information is needed,

2. Locate, access, and retrieve it efficiently,

3. evaluate and use it effectively to achieve certain goals

4. use information effectively to accomplish a specific purpose

5. Understand many of the economic, legal, and social issues surrounding the use of information and access and use information ethically and legally.
Standard One The information literate person recognises the need for information and determines the nature and extent of the information needed

Standard Two The information literate person finds needed information effectively and efficiently

Standard Three The information literate person critically evaluates information and the information seeking process

Standard Four The information literate person manages information collected or generated

Standard Five The information literate person applies prior and new information to construct new concepts or create new understandings

Standard Six The information literate person uses information with understanding and acknowledges cultural, ethical, economic, legal, and social issues surrounding the use of information

Performance Level Definitions And Performance Standards Recommended For Proficient And Advanced Levels On The 60-item ILT

Proficiency Performance Descriptors
Level Standard Proficient 39 (65%).

The student who is Proficient is able to:

1. Describe how libraries are organized.
2. Define major library services.
3. Choose the appropriate type of reference source for a particular information need.
4. Identify common types of citations.
5. Employ basic database search strategies.
6. Locate a variety of sources in a library or online.
7. Discriminate between scholarly and popular publications.
8. Legally and ethically use information.

Advanced 54 (90%). The student who is Advanced is able to attain the criteria for Proficient and:

1. Modify and improve database search strategies to retrieve better results.
2. Employ sophisticated database search strategies.
3. Interpret information in a variety of sources.
4. Evaluate information in terms of purpose, authority and reliability.
5. Understand ethical, legal, and socioeconomic issues relating to information access and use.

Outcome 3: Evaluate information and its sources critically

Measurable behavior / action

1.
2.
3.
4.
5.

Measuring instrument

1.
2.
3.
4.
5.
Outcome 4: incorporate selected information into one’s knowledge base

Measurable behavior / action

1. 
2. 
3. 
4. 
5. 

Measuring instrument

1. 
2. 
3. 
4. 
5.
Outcome 5: use information effectively to accomplish a specific purpose

Measurable behavior / action

1.
2.
3.
4.
5.

Measuring instrument

1.
2.
3.
4.
5.
How good is the library collection?

Quality
1.
2.
3.

Quantity

2.
3.
How good is the library collection?

**Quality**
1. award-winning titles
2. expert reviews
3. citation studies
4. users studies
5. up-to-date

**Quantity**
1. standards
2. benchmark
3.
How good are the library’s services?

**July 2007**

</table>
1. Time taken to check out library materials:
   a) 1-2 minutes   b) 3-4 minutes   c) 5-6 minutes
   d) more than 7 minutes

2. Time taken to locate needed materials on the shelf:
   a) 5-10 minutes   b) 11-20 minutes   c) 21-30 minutes
   d) more than 30 minutes

3. Frequency of obtaining materials listed in the OPAC:
   a) 100%   b) 90% of the time   c) 80% of the time
   d) 70% and less

4. Time between requesting for books and obtaining them from ILL service:
   a) 24 hours   b) 2-3 days   c) 4-5 days
   d) more than 5 days

5. The quantity of original card catalogs produced in one hour:
   a) 3-5 books   b) 6-7 books   c) 8-11 books
   d) 12-15 books

Information Literacy Continuum

**EDUCATION**
- Level 0 - Kinder Garden
- Level 1 – Elementary
- Level 2 - Junior High
- Level 3 - High School
- Level 4 - Post-secondary
- Level 5 – Undergraduate
- Level 6- Research

**LEVEL**
- Basic
- Medium
- High
- Advanced

**SKILLS**
- Definition and articulation of information need
- Location and access of information
- Assessment of information
- Organization of information
- Use of information
- Communication and ethical use of information

(UNESCO, 2008:19)
