List of figures, tables, special contributions and text boxes

Figures

1.1: Major killers – the sources of childhood mortality .......................................................... 30
1.2: Children of mothers who attended secondary school have a lower risk of dying ........... 31
1.3: Countries with similar levels of income can have very different rates of malnutrition .... 32
1.4: Pre-primary participation has increased significantly in many countries ....................... 33
1.5: Children in rich households are more likely to attend early learning programmes ......... 34
1.6: Education saves lives – mortality rates fall with maternal schooling ......................... 35
1.7: The education dividend could save 1.8 million lives ..................................................... 35
1.8: Immunization coverage rises with women’s education ................................................... 36
1.9: Awareness of HIV and AIDS – education provides protection ................................. 37
1.10: Educated women are more likely to seek testing for HIV during pregnancy .............. 37
1.11: Half the world’s out-of-school children live in just fifteen countries ......................... 41
1.12: Many children out of school are expected never to enrol ............................................ 43
1.13: The chances of going to school vary enormously within countries ............................ 43
1.14: Progress towards universal primary education has been uneven ............................. 44
1.15: Countries face different hurdles to achieve UPE ......................................................... 44
1.16: The number of children entering school at the official starting age is low in many countries 45
1.17: Progress in survival to the last grade of primary school has been mixed ............... 46
1.18: Poverty and vulnerability strongly influence a child’s chance of completing primary school 47
1.19: Patterns of dropout differ across grades ................................................................. 48
1.20: Children from poor households are more likely to drop out ..................................... 49
1.21: Grade progression can improve substantially with the right reforms ...................... 53
1.22: Expansion in secondary school participation ........................................................... 55
1.23: Urban youth have better chances of completing secondary education .................... 56
1.24: Regional gaps in tertiary enrolment rates are widening ........................................... 57
1.25: People with low skills face increased risk of unemployment .................................... 58
1.26: Surveys in wealthy countries point to disparities in literacy skills ......................... 59
1.27: Access to continuing education and training is inadequate in many European countries 59
1.28: Literacy deficits rise with age .................................................................................. 61
1.29: The majority of illiterate adults live in ten countries ................................................. 66
1.30: Many countries are unlikely to achieve the literacy goal ......................................... 66
1.31: Patterns of literacy are related to household location and wealth ................................ 67
1.32: Prospects for achieving gender parity in secondary education by 2015 are low for many countries 74
1.33: There are distinct gender patterns in primary school participation ......................... 76
1.34: The gender pattern of secondary school completion is mixed ................................ 77
1.35: Gender disparities in labour force participation are large in many regions ............ 78
1.36: There are wide disparities in learning achievement across countries .................... 84
1.37: Reading skills vary widely in sub-Saharan Africa ..................................................... 85
1.38: Learning achievement in mathematics in Latin America ......................................... 85
1.39: Differences in learning achievement are related to wealth and location .................... 87
1.40: Overall reading levels are low in India, with large differences across regions .......... 89
1.41: There are wide disparities in early grade reading skills across Kenya ..................... 89
1.42: Learning differences between children reflect wealth and gender ........................... 90
1.43: There are large disparities in learning among schools ............................................. 90
1.44: Differences in school quality are an important driver of learning disparities .......... 91
