Nature-based solutions can:

- ◆ Improve the supply & quality of water
- ◆ Reduce the impact of natural disasters

📄 <http://on.unesco.org/WWDR2018> #wwaterforum #wwdr2018

Healthy grasslands, wetlands and forests can improve the quantity and quality of water

📄 <http://on.unesco.org/WWDR2018> #wwaterforum #wwdr2018

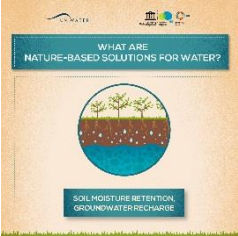

If we do nothing, some five billion people will be living in areas with poor access to water by 2050.

Working with nature, we can achieve water security for all.

Green water solutions could increase agricultural production by 20% worldwide and up to 79% in some low-income countries LINK - #wwaterforum #wwdr2018

Thanks to green water solutions, New York City saves more than US\$ 300 million yearly on water treatment and maintenance costs - LINK - #wwaterforum #wwdr2018

Wetlands directly impact water quality by filtering toxic substances from pesticides, industrial and mining discharges LINK - #wwaterforum #wwdr2018

Wetlands can remove 20 to 60% of metals in water, but they have their limits.

Let's find the right balance between grey and green infrastructure!
