

AFRICA

ENGINEERING

WEEK 2015

14 - 19 September

For further information please visit: www.unesco.org
or contact Rovani Sigamoney - UNESCO Engineering Initiative
r.sigamoney@unesco.org

United Nations
Educational, Scientific and
Cultural Organization

Engineers are the drivers of innovation,
social and economic developments,
and are necessary to solve global
challenges such as sustainable
development, climate change mitigation
and poverty reduction.

One week long

students in schools across Africa
will undergo educational workshops
with a focus on engineering.
