Preface			
KOICHIRO MATSUURA, DIRECTOR-GENERAL, UNESCO			
HIROYUKI YOSHIKAWA, PRESIDENT, ICSU	5		
Introduction			
MAURIZIO IACCARINO, ASSISTANT DIRECTOR-GENERAL FOR NATURAL SCIENCES, UNESCO	6		
OPENING SESSION	15		
Opening addresses	16		
ÁRPÁD GÖNCZ, PRESIDENT, REPUBLIC OF HUNGARY	16		
FERENC GLATZ, PRESIDENT, HUNGARIAN ACADEMY OF SCIENCES	18		
PÁL PATAKI, CHAIRMAN, EXECUTIVE BOARD, UNESCO	22		
WERNER ARBER, PRESIDENT, ICSU	24		
FEDERICO MAYOR, DIRECTOR-GENERAL, UNESCO	26		
Keynote speeches	29		
Science for the 21st century			
JOSÉ ISRAEL VARGAS, BRAZIL	29		
Science in response to basic human needs			
M.S. SWAMINATHAN, INDIA	33		
The scientist as global citizen			
NEAL LANE, USA (DELIVERED BY BRUCE ALBERTS)	41		
Science and human values			
JOSEPH ROTBLAT, UK	45		
FORUM I: Science: achievements, shortcomings and challenges	51		
PLENARY SESSION			
The nature of science			
PAUL HOYNINGEN-HUENE, GERMANY	52		
The universal value of fundamental science			
MIGUEL A. VIRASORO, ITALY	57		
The scientific approach to complex systems			
ROBERT MAY, UK	63		
International cooperation in science			
JULIA MARTON-LEFÈVRE, USA	66		
L'enseignement des sciences			
GUY OURISSON, FRANCE	73		
Reformation of scientific disciplines			
HIROYUKI YOSHIKAWA, JAPAN	76		
THEMATIC MEETINGS			
I.1 THE NATURE OF SCIENCE	80		
What makes science unique in the experience of mankind?			
The specificity of the scientific approach			
MARIA CARLA GALAVOTTI, ITALY	80		
How modern science was born and developed			
CLAUDE DEBRU, FRANCE	82		
About anti-science, para-science and pseudo-science			
ROBERT HALLEUX, BELGIUM	84		
Western and non-Western science: history and perspectives			
JUAN JOSÉ SALDAÑA, MEXICO	86		
The invention of classical scientific modernity			
ROSHDI RASHED, FRANCE	88		
A new survey of the Needham Question			
LIU DUN, PEOPLE'S REPUBLIC OF CHINA	88		
Thematic meeting report			
PAUL HOYNINGEN-HUENE, GERMANY	90		
I.2 THE UNIVERSAL VALUE OF FUNDAMENTAL SCIENCE	92		
Science as a productive force			
MOHAMMAD A. HAMDAN, JORDAN	92		
Forging an alliance between formal and folk ecological knowledge			
MADHAV GADGIL, INDIA	94		
Fundamental science: a view from the South			
MANUEL PEIMBERT, MEXICO	98		
Thematic meeting report			
IAN BUTTERWORTH, UK	100		
I.3 SCIENCE IN RESPONSE TO BASIC HUMAN NEEDS	103		
Introduction			
ABDULAZIZ OTHMAN ALTWAJRI, MOROCCO	103		
Scientific capabilities in the research on basic needs for development			
EDUARDO MOACYR KRIEGER, BRAZIL	104		
Essential national health research, a powerful instrument in response to basic human health needs			
ESMAT EZZAT, EGYPT	106		
Development of biotechnology applied to food and health, to face basic human needs in developing countries			
MANUEL DE JESÚS LIMONTA VIDAL, CUBA	110		
Science in response to basic human needs, with special reference to water			
RIADH H. AL-DABBAGH, IRAQ	113		
The ZERI approach to responding to basic human needs with special reference to poverty alleviation, energy and shelter			
KETO MSHIGENI, GEOFFREY KIANGI, FERGUS MOLLOY, OSMUND MWANDEMELE AND STEPHEN ADEL, NAMIBIA, AND GUNTER PAULI, SWITZERLAND	116		
The responsibility of science in the alleviation of poverty in the world			
THOMAS R. ODHIAMBO, KENYA	118		
Thematic meeting report			
G. THYAGARAJAN, INDIA	120		
I.4 THE SCIENTIFIC APPROACH TO COMPLEX SYSTEMS	122		
The predictability of climate			
TIMOTHY N. PALMER, UK	122		

Modelling of policy-making and policy implementation ARILD UNDERDAL, NORWAY	122	I.8 SCIENCE AND THE ENVIRONMENT	165
Towards an integrative biology and GaiaList 21: new programmes for better understanding of living beings MOTONORI HOSHI, JAPAN	124	The environmental consequences of tropical deforestation CARLOS E.P. CERRI, BRAZIL	165
Uncertainty and complexity: a mathematician's point of view JACOB PALIS, BRAZIL	125	Human-induced changes in the global nitrogen cycle: implications for coastal ecosystems DONALD F. BOESCH, USA	166
Thematic meeting report ERNŐ MÉSZARÓS, HUNGARY	127	Global climate change and cycling of toxic metals JEROME O. NRIAGU, NIGERIA	168
I.5 SCIENCE ACROSS BORDERS	129	The role of the oceans in global climate change JOHN G. FIELD, SOUTH AFRICA	169
Scientific cooperation in Latin America OSCAR GRAU, ARGENTINA	129	Water resources for human use: a perspective in view of climate variability impacts MARÍA CONCEPCIÓN DONOSO, PANAMA	170
Science across borders: how far to the goals? A point of view from a developing country QIHENG HU, PEOPLE'S REPUBLIC OF CHINA	129	Global problems related to biodiversity science, especially the effects of invasive species JOSÉ SARUKHAN, MEXICO	173
International collaboration in science: lessons from CERN CHRIS LLEWELLYN-SMITH, UK	132	Thematic meeting report ANDRAS SZÖLLÖSI-NAGY, UNESCO	173
Scientific international cooperation – an imperative ENRIC BANDA, FRANCE	135	I.9 THE BIOLOGICAL REVOLUTION AND ITS IMPLICATIONS FOR HEALTH	177
International collaboration in the fields of life/brain science MASAO ITO, JAPAN (REPRESENTED BY REIKE KURODA)	137	The biological revolution and its implications for health: an overview JORGE E. ALLENDE, CHILE	177
Thematic meeting report STEFAN MICHALOWSKI, OECD	137	Genetics and health MAXINE SINGER, USA	177
I.6 SHARING SCIENTIFIC KNOWLEDGE	140	Application and implication of the cloning of a disease gene: cystic fibrosis as an example LAP-CHEE TSUI, CANADA	179
Normative issues for electronic publishing in science MARK S. FRANKEL, USA	140	New perspectives on ageing EDIT BEREGI, HUNGARY	181
Scientific data in the Internet era JOHN RUMBLE JR, USA	142	Vaccines for the future PAUL-HENRI LAMBERT, WHO	183
The development of the Internet in China and its influence on sharing of scientific information WANG XUAN, PEOPLE'S REPUBLIC OF CHINA	144	How to overcome the AIDS crisis: the view of a scientist LUC MONTAGNIER, FRANCE	184
Sharing scientific knowledge through publications: what do developing countries have to offer? ANA MARIA CETTO, MEXICO	148	La révolution biologique : quels enjeux pour l'Afrique ? MIREILLE DAVID-PRINCE, TOGO	186
Copyright versus freedom of scientific communication P. BERNT HUGENHOLTZ, NETHERLANDS	150	Concluding remarks: a Latin American perspective JORGE E. ALLENDE, CHILE	190
Access to information now and in the future DAVID RUSSON, UK	152	Thematic meeting report NICOLE BIROS, WHO	192
Thematic meeting report KAI-INGE HILLERUD, SWEDEN	153	I.10 SCIENCE, AGRICULTURE AND FOOD SECURITY	196
I.7 SCIENCE EDUCATION	156	Biotechnology: a new input to agricultural research and food security MARC VAN MONTAGU, BELGIUM	196
Science education for development: case study of Project 2000+, ELSSA SAM TUNDE BAJAH, NIGERIA	156	Creating a global knowledge system for food security BRUCE ALBERTS, USA	198
Science education in schools COLIN N. POWER, UNESCO	156	Science and agriculture: mobilizing society for food security MERVAT BADAWI, KUWAIT	200
Using modern distance education to improve science education in developing countries WEI YU, PEOPLE'S REPUBLIC OF CHINA	159	Thematic meeting report ENRICO PORCEDDU, ITALY	203
Thematic meeting report LEON M. LEDERMAN, USA	162		

I.11 SCIENCE, ETHICS AND RESPONSIBILITY	206	FORUM II: Science and society	255
Introduction		PLENARY SESSION	
HE VIGDIS FINNBOGADOTTIR, ICELAND	206	Public perception of science: between acceptance and rejection	
The increasing gap between North and South: a globalization paradox		JOHN DURANT, UK	256
JOSÉ MARÍA CANTÚ, MEXICO	208	Science for development	
Is human cloning inherently wrong?		SHEM O. WANDIGA, KENYA	260
MARGARET A. SOMERVILLE, CANADA	209	Science as an institution: setting priorities in a new socio-economic context	
Science, ethics and responsibility in a globalized economy		PARTHA DASGUPTA, UK	264
SHEM O. WANDIGA, KENYA	211	Science: the gender issue	
Science, ethics, responsibility: the principle of precaution		LYDIA P. MAKHUBU, SWAZILAND	272
BISERKA BELICZA, CROATIA	213	A new social contract for science	
Scientific power, economic power and political power		JANE LUBCHENCO, USA	278
RYUICHI IDA, JAPAN	215	Science for future generations	
Thematic meeting report		LU YONGXIANG, PEOPLE'S REPUBLIC OF CHINA	281
MATTHIAS KAISER, NORWAY	217		
I.12 SCIENCE AND ENERGY	221	THEMATIC MEETINGS	
Energy policy: strategy and challenges for the future – a technology perspective		II.1 PUBLIC PERCEPTION OF SCIENCE: BETWEEN ACCEPTANCE AND REJECTION	287
CHIHIRO WATANABE, JAPAN	221	Public perceptions of the connection between scientific research and social progress	
Distributed power: a challenge for the 21st century		BRUCE V. LEWENSTEIN, USA	287
JOHN LOUGHHEAD, FRANCE	223	Public perception of science and anti-science as counter-culture	
The role of science in the development of fission and fusion energy		SERGEY KAPITZA, RUSSIAN FEDERATION	287
DOUGLAS W. MUIR AND V. PRONYAEV, AUSTRIA	225	Public understanding of science: essentials and its practice	
The role of science, engineering, economics and environment in the energy system of the 21st century		ZHANG KAI XUN, PEOPLE'S REPUBLIC OF CHINA	290
JYOTI K. PARIKH, INDIA	228	Science centres: a motivational asset	
Challenges for R&D in renewable and solar energy technology		PER-EDVIN PERSSON, FINLAND	292
GERNOT J. OSWALD, GERMANY	230	Science in the Third World: a paradox of prestige and neglect	
Energie pour un développement durable de l'Afrique		MARTIN F. YRIART, SPAIN	295
ABDOUSSALAM BA, NIGER	235	L'Afrique refuse-t-elle la science ?	
The contribution of S&T development to sustainable energy in developing countries with a case study on Indonesia		GERVAIS MBARGA, CAMEROON	298
HARIJONO DJODIHARDJO, INDONESIA	239	Thematic meeting report	
Thematic meeting report		JOHN DURANT, UK	300
UGO FARINELLI, ITALY	244		
I.13 SCIENCE AND NEW MATERIALS	247	II.2 SCIENCE FOR DEVELOPMENT	302
New materials: their contribution to our future		Introduction	
JOHN CORISH, IRELAND	247	ABDULAZIZ OTHMAN ALTWAIJRI, ISESCO	302
Challenges for polymer science in the 21st century		Science and survival in the coming decades	
ALEXEI R. KHOKHLOV, RUSSIAN FEDERATION	249	C.N.R. RAO, INDIA	303
The importance of interfaces in materials science		Science, development and globalization	
ROGER G. HORN, AUSTRALIA	249	AHMAD JALALI, IRAN	303
Small-scale materials science with large-scale facilities		Addressing the socio-economic developmental needs of society: contribution of the geosciences	
BRUCE D. GAULIN, CANADA	251	GODWIN O.P. OBASI, NIGERIA	307
Porous solids, environment and strategic developments		Science for development: the approach of a small island state	
GÉRARD FERREY, FRANCE	252	GERALD C. LALOR, JAMAICA	307
Computer modelling of materials on the atomic scale		Building capacity and creativity in science for sustainable development in the South	
RICHARD A. CATLOW, UK	252	ADNAN BADRAN, JORDAN	310
Thematic meeting report			
JOHN CORISH, IRELAND	253		

European Union research programmes with linkages to development JORMA ROUTTI, EUROPEAN COMMISSION	313	Prospects for science in Latin American countries LUIS MASPERI, BRAZIL	356
Thematic meeting report MOHAMED H.A. HASSAN, SUDAN	314	Dubna: an island of stability ALEXEI SISSAKIAN, RUSSIAN FEDERATION	358
II.3 SETTING PRIORITIES IN A NEW SOCIO-ECONOMIC CONTEXT	316	Building a new social contract DOMINIQUE FORAY, FRANCE	361
The feasibility of science foresight: what are the priorities? THIERRY GAUDIN, FRANCE	316	Thematic meeting report HEIDI DIGGELMANN, SWITZERLAND	364
Setting priorities in a new socio-economic context: an industrialist's view JENS ROSTRUP-NIELSEN, DENMARK	319	II.6 SCIENCE, INDUSTRY AND KNOWLEDGE AS A PUBLIC GOOD	365
Science and priorities in open societies JOHN DE LA MOTHE, CANADA	322	Science: a legitimate path to understanding PAUL BERG, USA	365
S&T priorities and policy issues: the Latin-American experience HEBE VESSURI, VENEZUELA	326	Views from the electronics industry BERNT ERICSON, SWEDEN	367
S&T in the Kingdom of Saudi Arabia: priorities and impediments SALEH A. AL-ATHEL, SAUDI ARABIA	329	The engineering and steel industry ECKHARD ROHKAMM, GERMANY	368
Thematic meeting report JEAN-ERIC AUBERT, OECD	332	R&D, innovation and the knowledge-based economy: the Canadian experience ARTHUR J. CARTY, CANADA	370
II.4 GENDER MAINSTREAMING IN SCIENCE AND TECHNOLOGY	334	Thematic meeting report ALBERT FISCHLI, SWITZERLAND	373
Gender and science, engineering and technology SIAMSI AH CHMAD, INDONESIA	334	II.7 NEW MECHANISMS FOR FUNDING SCIENCE	375
Research and informal education by women scientists for sustainable development in Africa: a role for TWOWS GRACE ALELE WILLIAMS, NIGERIA	335	Adding value to national research: a need for glue money and development of new partnerships JOHN MARKS, NETHERLANDS	375
Principles and strategies for integrating gender equity in S&T policies: a debate in progress GLORIA BONDER, ARGENTINA	338	S&T cooperation and the role of Asia KOICHIRO MATSUURA, JAPAN	378
The role of women in science for sustainable human development ALEKSANDRA KORNGHAUSER, SLOVENIA	340	Management of new mechanisms for funding science JAIME LAVADOS, CHILE	381
Promoting science learning for girls and women: policies for human resources development SHIRLEY M. MALCOM, USA	342	Financer la science en pays pauvres dans le contexte de la mondialisation : perspectives et défis CHARLES BINAM BIKOI, CAMEROON	383
S&T for development: the gender dimension FARKHONDA HASSAN, EGYPT	344	CEOS as a case study of an informal mechanism ROY GIBSON, FRANCE	385
Thematic meeting report Geoffrey Oldham, UK	346	Thematic meeting report KIRSTEN BROCH-MATHISEN, NORWAY	386
II.5 A NEW SOCIAL CONTRACT FOR SCIENCE	348	II.8 SCIENTIFIC EXPERTISE AND PUBLIC DECISION-MAKING	388
Basic science and society HERWIG SCHOPPER, GERMANY	348	Scientists in the service of decision-making URI SHAMIR, ISRAEL	388
What does it mean, a social contract for science? EVANDRO AGAZZI, ITALY	349	Some observations on the role of science in public policy THOMAS A. BRZUSTOWSKI, CANADA	388
The social contract with science in developing countries YOGINDER K. ALAGH, INDIA	351	Role of science in the evolution of disaster management BARBARA E. CARBY, JAMAICA	390
A need for capacity-building in Africa FRANCIS K.A. ALLOTEY, GHANA	352	Thematic meeting report NIKOLAI PLATÉ, RUSSIAN FEDERATION	392
Access to healthy water and an efficient wastewater treatment system MARIE-MARGUERITE BOURBIGOT, FRANCE	354	II.9 JOINING FORCES FOR A SUSTAINABLE WORLD	394
		Sustainable consumption in Europe: visionary or illusory? BRIAN HEAP, UK	394

World population growth: issues and policy implications of demographic changes PRAKASH N. TANDON, INDIA	396	II.12 SCIENCE AND OTHER SYSTEMS OF KNOWLEDGE	432
Science, a learning model for development YVES QUÉRÉ, FRANCE	398	What relationship between scientific and traditional systems of knowledge? Some introductory remarks DOUGLAS NAKASHIMA, UNESCO	432
Food in transition to sustainability LEE YEE CHEONG, MALAYSIA	399	Systems of knowledge: dialogue, relationships and process KENNETH RUDDLE, JAPAN	433
International health: changing patterns and policy implications ERLING NORRBY, SWEDEN	401	Indigenous knowledge and conservation policy: aboriginal fire management of protected areas MARCIA LANGTON, AUSTRALIA	435
Sustainability: Central and Eastern European aspects GÁBOR NÁRAY-SZABÓ, HUNGARY	402	Les savoirs agricoles traditionnels dans la production vivrière en Afrique subsaharienne LAZARE MAURICE SÉHOUÉTO, BENIN	436
Thematic meeting report JOHN P. CAMPBELL, USA	404	Improving health care by coupling indigenous and modern medical knowledge: the scientific bases of Highland Maya herbal medicine in Chiapas, Mexico OVERTON BRENT BERLIN, USA AND ELOIS ANN BERLIN, MEXICO	438
II.10 SCIENCE AS A DEMOCRACY: A SOCIAL PERSPECTIVE	405	Educating today's youth in indigenous ecological knowledge: new paths for traditional ways ROBBIE MATHEW, CANADA	439
Science in totalitarian and post-totalitarian regimes RAINER EISEFELD, GERMANY	405	Thematic meeting report DOUGLAS NAKASHIMA, UNESCO	442
The idea of the university in a democratic society PIOTR SZTOMPKA, POLAND	406	FORUM III: Towards a new commitment	445
Scientific autonomy and democratic debate ALBERTO MARTINELLI, ITALY	406	Plenary address VIKTOR ORBAN, PRIME MINISTER, REPUBLIC OF HUNGARY	446
Action on climate change: a case study JAMES C.I. DOOGE, IRELAND	408	International Forum of Young Scientists	448
Social science and democracy in Africa L. ADELE JINADU, NIGERIA	410	International NGO consultation	452
Science, discernment and democracy LOURDES ARIZPE, MEXICO	412	Towards a new commitment	453
Science and democracy: public attitudes to science and scientists ROBERT M. WORCESTER, UK	414	CLOSING SESSION	455
Thematic meeting report RAINER EISEFELD, GERMANY	417	Closing addresses	456
II.11 COMMUNICATING AND POPULARIZING SCIENCE	419	WERNER ARBER, PRESIDENT, ICSU	456
Introduction WINFRIED GOEPFERT, GERMANY	419	FEDERICO MAYOR, DIRECTOR-GENERAL, UNESCO	458
Science communication: a duty of scientists PAOLA CATAPANO, SWITZERLAND	419	JÓZSEF HÁMORI, MINISTER OF NATIONAL CULTURAL HERITAGE, REPUBLIC OF HUNGARY	460
Training scientists to understand and love the media TOSS GASCOIGNE AND JENNI METCALFE, AUSTRALIA	422	CONFERENCE DOCUMENTS	461
Audiences: the missing variable in science communication CAROL L. ROGERS, USA	425	Declaration on Science and the Use of Scientific Knowledge	462
Popularizing science: a necessity or a luxury in a developing country? NOHORA E. HOYOS, COLOMBIA	427	Introductory Note to the Science Agenda – Framework for Action	468
Science festivals and weeks: adaptable vehicles for science communication PETER BRIGGS, UK	429	Science Agenda – Framework for Action	476
Thematic meeting report ISTVÁN PALUGYAI, HUNGARY	430	Basis for follow-up activities	484
		ANNEXES	487
		Programme of the Conference	488
		Associated meetings	489
		Cooperating bodies	492
		Officers of the Conference	493
		List of participants	494
