Internet access tariffs

Nationally and internationally the pricing of Internet access differs a great deal. There are options of full Internet access at variable prices and fixed prices, prices for only local Internet access and for only e-mail, etc. Table A.7 presents some examples of prices in selected countries including a monthly dial-up charge of 20 hours of Internet use, local telephone charge and Internet Service Provider (ISP) charge (including VAT).

Internet traffic

Of the traffic over the Internet, the traffic on the World Wide Web (WWW) is by far the largest. The diagram below shows the estimated traffic in 1998 by type of service and a forecast for the year 2003.

Purchasing on the Internet

Use of the Internet, and primarily the WWW, as a market place, is steadily evolving. According to Nielsen Media Research, around 26% of the Net users in Canada and USA have purchased something via Internet. During 1998 the products most sold were the following:

Product	Estimated % of Net users who purchased
Books	7.1
Hardware	5.6
Software	5.1
Travel	3.6
Clothing	3.5

According to this survey the gender distribution of purchasers were 71% male and 29% female.

Purchasing for the Internet: Worldwide Market Forecast

Table A.8 shows estimates for products and services that are purchased primarily to enable access to information and applications through the Internet or a corporate intranet, not for general use. (CAGR stands for Compound Annual Growth Rate.)

Table A.8 → Worldwide Internet and intranet products and services, 1996 and 2000, in millions of \$
