

Table 26.4: **Progress towards targets for renewable electricity generation in Pacific Island countries, 2018**

	Share of electricity generated from renewable sources, 2018 (%)	Target for share of renewables in electricity generation (%)	Timeline for target	Policy framework
Papua New Guinea	62.0	100	2030	<i>National Energy Policy 2016–2020</i>
Fiji	60.0	100	2036	in preparation; see <i>National Energy Policy 2013–2020</i>
Samoa	42.0	100	2017	<i>Energy Sector Plan 2017–2022</i>
Cook Islands	26.0	100	2020	<i>Renewable Electricity Chart 2011–2020</i>
Tuvalu	23.0	100	2020	<i>Master Plan for Renewable Electricity and Energy Efficiency, 2012–2020</i>
Vanuatu	22.0	100	2030	<i>National Energy Road Map 2016–2030</i>
Niue	14.0	80	2025	<i>Strategic Energy Road Map 2015–2025</i>
Tonga	10.0	50	2020	<i>Energy Road Map 2010–2020</i>
Nauru	2.0	50	2020	<i>Energy Road Map 2018–2020</i>
Palau	2.0	45	2025	<i>National Energy Policy 2010–2020</i>
Kiribati	17.0	40	2025	<i>Integrated Energy Roadmap 2017–2025</i>
Micronesia	5.0	30	2020	<i>Energy Master Plans (2018)</i>
Solomon Islands	6.0	20	2020	<i>National Energy Policy (2014)</i>
Marshall Islands	2.0	20	2020	<i>Electricity Roadmap (2018)</i>

Note: Data for Kiribati's share of electricity generated from renewable sources in 2018 cover solar energy in South Tarawa only.
